

## HAND-PROPELLED, OVERHEAD I-BEAM PT TROLLEYS

**CAPACITIES**

1/4 to 50 Tons

**BEAM ADJUSTMENT  
RANGE**

2.66 to 8 in.

**MINIMUM  
RADIUS CURVE**

20 to 120 in.

**OPTIONS**Spark & Corrosion Resistance  
Clean Room

For easy hoist attachment and ease of movement, Chester offers a wide variety of manually operated plain and geared trolleys. These trolleys feature concentrically machined wheels for easy rolling motion as well as high-quality, anti-friction bearings to assure minimal effort is needed for positioning. All capacities feature heavy rolled steel side plates complete with bumper/drop stops as standard to provide a full face bumper to contact beam end stops.

**KEY FEATURES****MINIMUM MANUAL EFFORT & EASY MAINTENANCE**

Lifetime-lubricated precision ball bearings in ¼- to 3-ton capacities reduce manual effort and allow for easy maintenance. In 4- to 25-ton capacities, each trolley is equipped with eight sealed and tapered roller bearings that absorb the radial and thrust loads exerted in these heavier sizes while also allowing for ease of use and maintenance.

**STABLE AND RIGID CONSTRUCTION**

Heavy rolled-steel side plates are shaped to provide stability and rigidity.

**LOAD EQUALIZATION & SMOOTH OPERATION**

Steel equalizing pins connect the two halves of each trolley, providing load equalization and smooth operation.

**DURABLE, SMOOTH-RUNNING TROLLEY WHEELS**

Trolley wheels are long-wearing alloy cast iron. Wheel treads are machined to provide smoothest possible rolling motion. Steel axles are rigidly supported in the side frame. Steel trolley blocks reinforce the side plates as well as the equalizing pin.

\* NOTE: Consult factory for beams outside of this standard range.

\*\* NOTE: Beam height shown is for proper wheel running clearance only. The customer must verify their chosen beam is adequate for the intended application and loads. Consult factory for beams smaller than the minimum specified.

\*\*\*NOTE: Minimum radius applies to minimum flange width and may vary with beam. For curve applications consult factory. Curves must be specified when ordering.

1/4 through 20 ton units are supplied straight sided with universal wheels for operation on flat or tapered beams.

For patented track applications consult factory.

25 and 50 ton units are supplied with canted side plates for operation on standard American tapered I-beams.

For other beams consult factory.

NOTE: To better illustrate wheels, bumpers have been omitted from the drawings on this page. Wheels with convex treads are standard on all capacities 1/4 ton through 20 ton. 30, 40 & 50 ton trolleys are available furnished in tandem construction. Consult factory for dimensions. Dimensions vary proportionately with beam size.

## HAND-PROPELLED, OVERHEAD ADJUSTABLE **SWIVEL-TRUCK TROLLEYS**

**CAPACITIES**

1/4 to 6 Tons

**BEAM ADJUSTMENT  
RANGE**

2-5/8 to 8 in.

**MINIMUM  
RADIUS CURVE**

9-7/8 to 33-7/8 in.

**OPTIONS**Spark & Corrosion Resistance  
Wide Flange or Patented Track  
Clean Room

Chester swivel-truck trolleys are the ideal choice when your application requires a trolley that can traverse the tightest curves with ease while maintaining an absolute minimum distance between the runway beam and load eye. The forged steel load eye on these swivel-truck trolleys is suspended on a special load bar carried at each end by a swiveling two-wheeled trolley unit. Design allows for easy attachment of hook-suspended Chester Zephyr hoists.

**KEY FEATURES****MINIMUM MANUAL EFFORT & EASY MAINTENANCE**

Lifetime-lubricated precision ball bearings in ¼- to 2-ton capacities reduce manual effort and allow for easy maintenance. 3- to 6-ton capacity trolleys are equipped with eight sealed and tapered roller bearings that also reduce effort and promote easy maintenance.

**DURABLE, SMOOTH-RUNNING TROLLEY WHEELS**

Trolley wheels are cast iron and through hardened for long life. Wheel treads are concentrically machined to provide smoothest possible rolling motion.

**OPTIONS & CONFIGURATIONS**

Trolleys may be special ordered for operation on wide flange beams or patented track. A trolley track lock, trolley bumpers and anti-drop lugs can also be ordered with these units.

◀ **GEARED MODEL**

NOTE: Dimensions based on standard beams at maximum flange width.  
 \* Dimension will vary with beam size  
 \*\* Minimum under-the-beam clearance not necessarily at point indicated. Dimension will also vary with beam size
